

Inspired by the gentle changes in nature from season to season - why not create an exciting Chameleon Style Reversible Bedding Ensemble?

You can have two (or more) entirely different looks for a little more than the price of one.

Tips for Measuring

Accurate bed measurements are a must for creating a great bedding ensemble. Please fill in the spaces provided.

- Use a metal measuring tape, not a ruler or cloth measuring tape.
- For proper measuring for any style bed covering you select, fully dress your bed with any blankets and sheets you intend to use underneath.
- ** Measuring (E) & (F) ** (the length and width of your boxspring): Boxsprings often have rounded corners, which can take as much as a 1/2" - 1" off the finished length of your bedskirt. To measure more accurately, move your top mattress a little so you can measure from straight edge to straight edge (approx 4" in from the corner of the boxspring).
- The Desired Drop measurement is the length you want your topper (duvet, coverlet) or bedskirt to hang down.

First Name _____

Last Name _____

Mattress
